Honoring Faculty and Staff for Their Years of Dedication to the University

2011 SERVICE AWARDS

February 7, 2012
Student Activities Center

Stony Brook University
Dear Friends and Colleagues,

It is my pleasure to salute each of you for your outstanding service to Stony Brook University. Your hard work and dedication have played a major role in positioning Stony Brook among the elite of the world's universities. Whether saving lives in our hospital, making discoveries that change the world, enhancing the academic or extracurricular lives of our students, or ensuring the safety and the beauty of our working and learning environments, you all have made important contributions toward the unparalleled achievements of this University.

By honoring you today, Stony Brook celebrates the contributions of every faculty and staff member, as well as the collective effort that has been fundamental to our extraordinary growth. The commitment displayed by each of you is essential to the continuing success of our University and our community. I applaud your accomplishments and thank you sincerely for all that you have done and continue to do for our great University.

Sincerely,

Samuel L. Stanley Jr., M.D.

Stony Brook is many things—a place of learning, a leading research institution, a cultural oasis of theater and the arts—but most of all, it is a family: a collection of people who share the ultimate common bond of serving others. Through the years, faculty and staff have worked together to enhance the lives of thousands of students and our community as a whole. On these pages, we highlight those who have dedicated their time, efforts, and hearts to Stony Brook over the past five decades. We thank them for their determination to make our world the best it can be.

REFLECTIONS and Recollections

45 years
Mary Ann Bernero
Undergraduate Biology Program
Forty-five years as a staff member in the Biological Sciences was an outstanding experience for me. I've been an undergraduate and graduate student on this campus. Stony Brook gave me the opportunity to study, grow intellectually, and most of all to meet and work with bright faculty and exciting students. The atmosphere improved as the campus grew from a college to a major University. There were changes and challenges every year. I believe working for Stony Brook University gave me a youthful outlook on life. Every day, I look forward to coming to campus.

Donald Petrey
Cultural Analysis and Theory
The campus keeps getting better, so do the students.

40 years
Douglas Futuyma
Ecology and Evolution
I am extraordinarily fortunate to have joined my department at Stony Brook soon after its inception. It became one of the world’s outstanding centers of ecology and evolutionary biology, and it has been for me a second family and a continuing source of intellectual sustenance. I missed these when I went to another prestigious university, and happily returned with a greater appreciation of my department, of Stony Brook University, and of the New York/Long Island region. Since 1971, Stony Brook’s growth, despite periodic economic challenges, has been extraordinary; it has expanded in scope while maintaining excellence in the core subjects of arts and sciences. I trust that it will continue to weather continuing storms.

Philias Garant
Periodontics
Stony Brook's growth over these past 40 years has been truly remarkable. Yet there is more to be done to fulfill the Health Sciences Center master plan. It has been a pleasure and an honor to have played a role in the development of the Dental School. Thank you to all my colleagues for a wonderful experience on South Campus.

Bernard Lane
Pathology
I arrived just in time for the start of classes for the first entering classes of the School of Health Sciences. The faculty was small and I taught in every Pathology course that first year. Both the faculty and students thought of themselves as pioneers.

Peter Winker
Music
I was fortunate to get in on the ground floor of a music department that today enjoys an international reputation, and one where the quirky proclivities of a classical composer fascinated with popular music were not only tolerated but encouraged. As my role in the department has evolved from “house hippie” to “elder statesman,” I continue to be thankful for the warm, collegial atmosphere of my department, and for the opportunity to nurture several generations of extraordinary students.

35 years
Toby Buonagurio
Art
When I find something I genuinely love, I embrace it. I have been married to Edgar Buonagurio for 40 years, I have made flamboyant ceramic sculpture for more than 40 years, and I have been teaching my wonderful, exciting and amazing students at Stony Brook University for 35 years. I think that says it all! My artwork titled “Earth, Air, Fire, Water,” is permanently installed in the new Simons Center for Geometry and Physics. I am delighted it too will be part of Stony Brook for many decades as well.

Lou Charnon-Deutsch
Hispanic Languages and Literature
It is bittersweet to look back at the last 35 years at Stony Brook University: Sweet for all the memories of wonderful colleagues and staff, especially of students who have gone on to continue research and teaching at other universities and who remember their Stony Brook experience with pleasure. Sweet for thirty-five years sharing Stony Brook experience with my husband Dale Deutsch. Tanged with sadness at seeing Stony Brook lag in its commitment to the Humanities even as we surge ahead in so many other areas.

Ira Cohen
Physiology and Biophysics
It’s been a unique opportunity to watch a university grow and attempt to fulfill its promise. Two steps forward and then one step back but always an entertaining experience.

Dale Deutsch
Biochemistry and Cell Biology
I can’t believe it’s been 35 years. It only seems like 34!

Aldustus Jordon
Medicine/Office of the Dean
Thirty-five years ago I arrived at Stony Brook and began my career in medical education. The Medical School was searching for an identity and our facilities were new and yet untested. The University Hospital was little more than a dream masked in a massive steel structure. The final cubes of the Health Sciences Center were being built and the building was virtually empty except for a few raccoons that took full advantage of the ceiling crawl space and the escalators. I am grateful for the many colleagues and friends with whom I have worked and shared our hopes and dreams. Most of all, I thank the hundreds of students whom I have had the privilege to teach, counsel and mentor. You have all enriched my life and continue to be a source of pride to the Medical School.

Elaine Leffert
Coram Health Center
It has been my extreme pleasure to work for Stony Brook University Medical Center. The satisfaction I get from assisting patients in their time of need is very rewarding. The appreciation from the patients makes it all worthwhile.

Robert Liebermann
Geosciences
Establishing Geophysics, building the High Pressure Laboratory, creating the Mineral Physics Institute, founding the NSF Center for High Pressure Research, evolving to the Consortium for Materials Properties Research in Earth Sciences. All in collaboration with Don Weidner and strong support from colleagues in Geochemistry. Fond memories and wonderful experiences.

Edward O’Connell
Environmental Health and Safety
In looking back over my 35 years at SBU, I can say with a full and grateful heart “the days are long but the years are short.” I have witnessed many amazing changes at the University as we continue to reinvent and transform the institution from 500 mom and pop stores connected to a physical plant with a parking problem into the Berkeley of the East. Along my labyrinth-like SBU journey, I have met some awesome people and made many friends who have enriched my life beyond measure. My last touch: “The morning of a life time does lie at Stony Brook, give a rousing cheer for Stony Brook.” Go, Seawolves!

Jerold Stein
Student Affairs
When I arrived in 1976, what was most obvious were the many construction projects that were underway and the creation of the foundation of an academic program that would rival the best universities in the world. What wasn’t as apparent was the lack of a sense of community and university pride. Time, hard work, and some visionary leaders changed all that. After all, we are all Seawolves now!

Lucy Wilson
Residential Operations
I came, I saw, I conquered; to God be the glory.
REFLECTIONS and Recollections

30 years
Lori Escallier
School of Nursing
As I reflect on my past 30 years at Stony Brook, I am amazed! It’s been an incredibly rich three decades, full of blessings, challenges, growth, and opportunity. I am thankful to my friends and colleagues who have touched my life along this memorable journey.

Krin Gabbard
Cultural Analysis and Theory
Thirty years! Time flies when you’re having fun.

James Ganetis
Respiratory Care
It has been an honor to be a part of the growth and development of both the Respiratory Care services at University Hospital and the Respiratory Care and Polysomnography education programs at the School of Health Technology and Management. Thirty years of challenges and opportunities went by so quickly.

Karin Ganetis
Nursing Quality Management
As I celebrate 30 years of professional growth and challenges, I am grateful to those who have been my colleagues and mentors and value the extraordinary people I work with who care for our patients.

Deborah LaSassier
Neurological Surgery
I am very proud to have experienced the development and expansion of this State University Hospital. My first experience here at Stony Brook Hospital started in Labor and Delivery. I will never forget the very first birth I witnessed; it was amazing. Five years later, I transferred to PICU. I had never been around very sick infants before, the experience at times was very devastating and other times very rewarding. I met a young mom whose baby boy was very sick; the mom and I became very good friends, and 20 years later, we are still friends. Many years later, I transferred to the Neurology Unit. Being a member of the Neurology family, I have gained a sense of awareness and maturity. I’ve had a wonderful experience working here, all the interesting people I’ve met, allowed me to write my first book, Healing Through Poetry. Six books later, I am writing my first novel, and I would have to admit, my belief, feelings, and my attitude have definitely changed over the years due to the many interesting people and the experiences I have had here at Stony Brook University Hospital.

Alan Monheit
Obstetrics, Gynecology and Reproductive Medicine
Thirty years goes by amazingly fast, likely due to the incredibly interesting work I have done, my wonderful patients, and great staff/colleagues. Thanks for the memories!

Anita Moskowitz
Art
There have been many changes at Stony Brook during these past 30 years, most for the better, but one thing has not changed from my point of view: the enjoyment of teaching art history to both graduate and undergraduate students. It’s been a privilege to be on the SB faculty, where we are given the freedom to develop our own courses, and teach them in a way that is not only satisfying to students, but stimulating to our own intellectual development. Thank you, Stony Brook.

Bharathi Scott
Anesthesiology
It has been a great ride! I have enjoyed every minute of it. Thank you, Stony Brook.

Dennis Sheppard
Clinical Microbiology
I’m both appreciative and fortunate to have had the opportunity to contribute to the Clinical Microbiology Laboratory over the past 30 years. I have seen the laboratory go through many changes and positive strides. The laboratory staff is truly my Stony Brook family. Thirty years gone by in a flash—unbelievable!

Branford Snell
Procurement
I started working at Stony Brook at age 20. I have met some wonderful people along the way, some of whom I lost that meant a lot to me. What I’ve learned in 30 years is that it’s patient care first. Treat people the way you want to be treated, with respect. I have been working in Procurement for the past seven years as a buyer. It gives me satisfaction knowing that I am purchasing items from vendors that are helping people get well and saving others’ lives. As technology has grown so has our hospital too, being one of the best in the country.

Ellen Sotomayer
Obstetrics/Gynecology Clinic
Thirty years have flown by so quickly. Along the way I have witnessed the many changes and improvements at Stony Brook University Medical Center. I am most fortunate to have worked with so many caring, hardworking and professional individuals and to have made many lasting friendships. Stony Brook has been a place where one has the opportunity to grow not only professionally but also personally. I am very proud to have been a part of this great institution and look forward to the future ahead.

Felix Ramos Torres
Residential Operations
I am proud to be working for Stony Brook University for 30 years.

David Weiner
Melville Library
Ego vanit, ego saw, ego subsista. Thank you to Stony Brook University and the Library for providing me with the opportunity to work with great and dedicated staff. I have great memories: first as a student in the late 70s when I was hired as a student assistant in the Circulation Department, and as an employee in the same department since 1981; from a decade of softball championships with the Ruthless Administrators, to a decade-plus of Halloween parties for the library. It’s been rewarding working with students from all over the world and helping Stony Brook students and staff with their library needs. Thanks also to the past and present staff and student workers in the Circulation Department, who helped make the past 30 years so memorable. Trigenta annus vinit sic velox (thanks for English to Latin online translator!).

Barbara Wien
Staller Center for the Arts
I came to the then Fine Arts Center to volunteer some free time in 1980. After one semester, I joined the staff to start the Friends of the Arts and I’ve never stopped. I don’t know where 30 years have gone, but when you can end your work day with a concert by the Emerson Quartet or the Royal Winnipeg Ballet, why would I want to be anywhere else?

Gary Zieve
Pathology
Stony Brook University has provided an environment in which individuals can excel. Going forward we must build teams to answer the complex questions of the future. I hope to continue contributing to the success of Stony Brook University.

25 years
Darlene Caronia
Radiation Oncology
I have had the opportunity to grow professionally and personally. I am grateful to be part of a community of health care professionals who continually provide quality care to our patients and community. I am forever grateful to those who have been my mentors and to the Department of Radiation Oncology, for I have met so many lovely people over the past 25 years.

Joanne Conway
Business Office
It has been both an honor and a privilege to have worked here since June 1986. I have made wonderful friends and had several lovely experiences along the way. I have enjoyed watching the Hospital grow and change and I’m excited to see what is still to come!

Paul Edelson
School of Professional Development
So much has changed at Stony Brook since 1986 when I arrived. What has been consistent, however, is the range of opportunity that exists, the space for individual initiative, and the respect for excellence.
Jose Feliciano  
*Physics and Astronomy*

It has been very exciting, challenging, educational, and rewarding to be part of the amazing transformation and growth of this great institution over these past 25 years. The lessons learned here will carry me throughout my life.

Martha Furie  
*Pathology*

Physically, Stony Brook has been transformed over the 25 years I’ve been here. Professionally and personally, for me it happily remains much the same—a big University with a small-college feel. I’m grateful for the opportunities that Stony Brook has given me to advance in my career and, especially, for the many cherished friends I’ve made along the way.

Douglas Gabriele  
*Coram Health Center*

Since undergraduate school back in the ’70s when we walked on plywood from one building to the other in bad weather, to the metropolis it is now, I look back with satisfaction knowing Stony Brook has become a world leader in the arts and sciences and peace. Go, Seawolves!

Theresa Gaeta  
*Clinical Practice Management Plan*

In the last 25 years, my employment at Stony Brook University has given me the opportunity to grow and learn not only in the different roles I have had at CPMP but also in the friendships of my co-workers.

Daniel Gallagher  
*Radiology*

It has been a rewarding experience working in Interventional Radiology. I learned so much and gained so much experience doing a multitude of interventional procedures. Thank you.

Patricia Hines  
*Human Resource Services*

It has been a wonderful journey working here during the past 25 years. The most rewarding part has been helping our employees understand the state payroll system. There are always many new intricacies due to changes in the many unions on campus.

Theresa Leonard  
*Heart Center*

My professional career has evolved here at SB. Interestingly it has mirrored the growth of Cardiology over the past two and a half decades. I have witnessed the separation of CCU/MICU, the growth of the Open Heart Surgery program, the short but well-loved pediatric Open Heart program, the introduction of stents to Invasive Cardiology through to the present 4th generation Drug Eluting Stents, the development of the Electrophysiology Department, the development and use of Reopro for acute MI patients, to the Code H process for patients having an acute MI. I have touched the lives of hundreds having cardiac symptoms and they have taught me and touched me in return. It’s been extremely heartfelt growing here at SB!

David Massen  
*Lab Information Technology*

It has been an honor and a privilege to serve the hospital community since I arrived in May 1986. Working together with my colleagues in Pathology and IT, tremendous technical improvements have taken place throughout all areas of the lab (Blood Bank, Clinical Pathology, and Anatomic Pathology). I eagerly look forward to participating in planned modernizations that will further optimize laboratory operations and sustain the lab well into the future, as a world-class entity.

Ann Mary Mathai  
*Labor and Delivery Services*

Stony Brook has been a wonderful place to work. It is even better to see the growth and progress it is undergoing now. This will be a beacon to our community in the years to come.

Theresa McManus  
*Psychiatry*

Nietzsche said, “Without music life would be a mistake.” I feel very blessed that I have been able to spend the past 25 years of my life providing music therapy to patients in the psychiatry units at SBMC. Playing with patients, I’ve witnessed the organizing, spirit-lifting, and community building that occurs in music therapy. William Congreve’s words—“Music has charms to soothe a savage breast, to soften rocks, or bend a knotted oak”—are words I have seen and heard in action.

Rock on!

Joaquín Quiason  
*Management Engineering*

My professional and family journeys are closely intertwined at Stony Brook. I began my career here at Stony Brook University Hospital in February 1986. I was newly married a few months prior to being hired. Our two children were born at the University Hospital. As my wife and I raised them, at the same time I witnessed the growth of the Hospital into a respectable and indispensable institution on Long Island. I will always be grateful for the opportunities and support Stony Brook has provided to me and my family.

Lisa Romard  
*Pediatrics*

My career at Stony Brook University Medical Center in Pediatric nursing began February 6, 1986, and has grown into 25 years of amazing experiences, advanced education and nursing degrees, employment opportunities including direct patient care, research, administration, and education. The bonus has to be the special relationships and friendships developed while working side by side with some of the best health care workers I’ve ever known. I recently had the humbling life-changing experience of becoming a patient at Stony Brook. I pay tribute to this hospital and the health care workers involved for saving my life in more ways than I can explain. My recovery was highly motivated by my desire to return to my position as a pediatric NP at Stony Brook University Medical Center.

Sabina Steiner  
*School of Health Technology and Management*

How 25 years do fly! When I started here, the thought of still being at Stony Brook in 2011 would never have crossed my mind. It’s been a wonderful journey: Colleagues have become friends, the work is still rewarding, and taking advantage of the cultural and academic offerings have all enriched my life.

Jean Swartz  
*Cardiology*

I sometimes walk down that hall on L2 coming in or going out and I can’t believe I’ve been doing this for 25 years plus now. How fast it all goes. Now I have one child that’s graduated across the street, another who works upstairs, and yet another who works at Mather Memorial Hospital. Wow! Isn’t life grand!

William Wise  
*School of Marine and Atmospheric Sciences*

Twenty-five years…and, seemingly, in the blink of an eye. Thanks to my colleagues at SoMAS and elsewhere in the University for helping me make my time at Stony Brook so personally rewarding. Looking forward to the next 25! (just kidding)

Joan Zuckerman  
*Physiology and Biophysics*

Working in research the past 25 years has been a truly rewarding experience. I am very fortunate to be a part of a group doing worthwhile and interesting research and to work with people from all over the world. I could not ask for a better job!
