Honoring Faculty and Staff
for Their Years of Dedication
to the University

May 6, 2013
Student Activities Center
Dear Friends and Colleagues,

I am pleased to take this opportunity to offer my congratulations and to extend to you our sincere appreciation for the outstanding service you have rendered on behalf of Stony Brook University. Your hard work and dedication have played a major role in positioning this institution among the elite of the world’s universities, and we are extremely grateful for your commitment to our campus community. Whether saving lives in our Hospital, making discoveries that change the world, enhancing the academic or extracurricular lives of our students, or ensuring the safety and beauty of our working and learning environments, you all have made important contributions toward the unparalleled achievements of this world-renowned institution.

Stony Brook has accomplished so much in a relatively short period of time, and we recognize that your individual and collective efforts have been essential to our extraordinary growth and ongoing success. I applaud your accomplishments and thank you sincerely for all that you have done and continue to do for our great University. I personally look forward to your continued service and support as we work together to advance the mission and vision of this great institution.

Sincerely,

Samuel L. Stanley Jr., MD
Forty-five-year honorees, you were there when...

...about 500 students demonstrated outside the Library for 18 hours to protest the arrest of a former student in 1969. The campus chapter of Students for a Democratic Society presented President John S. Toll with demands related to military recruitment on campus and war-related research. After students ignored requests to vacate the building, the Suffolk County Police Department was called in.

...construction of a bridge to connect the Student Union and Library began in 1967. For 10 years the bridge went unfinished, earning the nickname, “Bridge to Nowhere.” Some said the delay was due to budget constraints, but legend has it that contractors inverted the blueprint and built the bridge backwards. Eventually it was completed and dedicated (left), but it was rarely used and was demolished in 2003.

...the Van de Graaf accelerator, a 57.5-ton atom smasher, arrived in 1967. It was the first of its kind of any university in the world.

...Leah Holland, the first woman on the swim team, won a medal in a Metropolitan Intercollegiate Championship in 1972.

...renowned biologist H. Bentley Glass was a member of the faculty and Stony Brook’s first distinguished professor of biology.

...about 500 students demonstrated outside the Library for 18 hours to protest the arrest of a former student in 1969. The campus chapter of Students for a Democratic Society presented President John S. Toll with demands related to military recruitment on campus and war-related research. After students ignored requests to vacate the building, the Suffolk County Police Department was called in.
Forty-year honorees, you were there when...

...phase 1 of the Fine Arts Center opened in 1975 with classrooms, rehearsal halls, studios and an art gallery. In 1979, an experimental theater, two black box theaters, recital hall and concert hall were added. It was renamed in 1988 for the University's friend and long-time supporter Max Staller.

...the Health Sciences Center was completed in 1976. Students in all the schools of the HSC moved there from temporary buildings on South Campus.

...Chemistry Professor Paul Lauterbur produced the first image of a living organism via nuclear magnetic resonance in 1973. Lauterbur received the Nobel Prize in Medicine in 2003 for his part in developing MRI technology.

...David Crosby and many well-known contemporary musicians performed on campus. Performers in the 1970s included The Beach Boys, Steve Miller, Bonnie Raitt, Frank Zappa and New Riders of the Purple Sage.

...the Marine Sciences Research Center was created as SUNY’s center for marine research, graduate education and public service. The 55-foot-long research vessel Onrust was acquired in 1975.
...the women’s volleyball team captured the New York State Division III Championship, the first women’s state title for Stony Brook.

...the End of the Bridge opened in 1978 as a restaurant and night club in the former Buffeteria in the Student Union.

...the Zebra Path was designed and hand-painted by student Kim Hardiman as part of a public art seminar in 1981.

...the Hospital opened in 1980 with 30 beds and an ambulatory care pavilion. It was the first major teaching hospital established in the United States since 1977 and the first in the SUNY system.

...New York Governor Hugh Carey cut the ribbon at the dedication of the Museum of Long Island Natural Sciences, housed in the Earth and Space Sciences Building. Steven Englebright was the museum’s founder/curator.
the Sunwood mansion was destroyed by fire in 1986. The 40-room, Tudor-style building was used as a conference center, guest facility, faculty retreat and site for conferences, concerts and social events. After it burned down, the grounds continued to be used for picnicking and swimming. In 2002 Sunwood was rebuilt as a presidential residence and site for entertainment, fundraising and other special events by the University community.

The Lecture Center was renamed in 1984 in honor of Senator Jacob K. Javits, who was a staunch advocate of higher education and a friend to Stony Brook. Three years earlier he had donated his public papers — which encompassed 34 years of public life — to Stony Brook.

SB football moved from club status to NCAA Division III in 1983. The Seawolves are now Division I and in the Big South Conference.
...the Pollock-Krasner House, former studio and home of Jackson Pollock and his wife, artist Lee Krasner, was deeded to the Stony Brook Foundation in 1987. Pollock was the leader of the Abstract Expressionist movement. The Foundation preserves the East End National Historic Landmark, which houses an art reference library and documentary archives, and is the site for lectures, art exhibits and courses. Krasner’s paint-spattered shoes are shown at left.

...Senator Ken LaValle participated in the first Campus Cleanup Day in 1988. Campus Cleanup Day has been supplanted by the annual Pride Patrol.

...the first Suffolk County Police helicopter touched down on the Hospital’s helipad. Helicopter transport to the Hospital is provided to the critically ill or injured throughout Suffolk County.

...the Long Island State Veterans Home opened in 1991. The skilled nursing care facility provides health and rehabilitative care to U.S. Armed Forces veterans and is an important site for geriatric research.

...in 1987 the first cardboard and duct-taped boats sailed across (or sunk trying to cross) Roth Pond, as one of Stony Brook’s favorite traditions — the annual Roth Pond Regatta — was born.
